Multivendor Endcaps (MVEs) are a proven success for all trading partners in the convenience channel and exemplify category management at its finest by featuring the best-selling, highly impulsive SKUs.

Candy and warehouse-delivered snacks generate higher average margins than SKUs supplied by DSD and deserve secondary placement on the path to purchase.

MVEs support the core, providing secondary placement to drive impulse and assure an in-stock position on the best-selling SKUs, as well as driving consumers to shop the primary aisles for a greater variety.

A one-year agreement must be signed by the retailer stating that:

1. **The rack will be placed on a front endcap in the store.**
2. **The rack will remain in the store for a period of one year.**
3. **The rack will remain stocked per the GSC plan-o-gram.**
4. **All products on the rack will be purchased from GSC.**
5. **Each rack placed will qualify for a $100 placement allowance for the first year and a $100 placement allowance the second year.**

5a. First Year

- **Retailer will receive a rack with all products listed on the plan-o-gram.**
- **Payment to retailer will be made at the end of the quarter that the product and rack are shipped.**
  - **Store price of initial shipment is $1,871.31+ (as of 02/17/26)**

5b. Second and Consecutive Years

- **Retailer must sign a renewal contract each year and set rack to the new plan-o-gram no later than June 30th, 2026.**
- **Payment to retailer will be made approximately August 1st of each year.**

Per my signature, I agree to the terms of the agreement as stated above.
